Memberships

The Hitachi Visualization Suite (HVS) provides user an access control mechanism that allows you to define and configure user access to entities in few simple steps.

The following articles describe the key concepts of memberships, including departments, members, and rules, as well as instructions for managing users and permissions within HVS:

- **Users**: Learn how to add, modify, and delete a user to HVS as well as how to activate the new users.
- **Groups and Permissions**: Learn how to create user groups and assign permissions to manage access control.
